

AGENDIA SCIENTIFIC PRESENTATIONS AT SABCS 2019

THURSDAY, DECEMBER 12

Racial disparities in breast cancer: Identifying predisposing clinical and molecular features associated with African American patients

Nunes R., et al.

POSTER: P2-10-08

POSTER SESSION 2: Epidemiology, Risk, and Prevention: Ethnic/Racial Aspects | Hall 1, 7.00 AM – 9.00 AM

Treatment recommendations in ER+ patients \leq 50 years: Comparison of the 21-gene assay and 70-gene signature in the PROMIS study

Tsai M., et al.

POSTER: P2-14-11

POSTER SESSION 2: Treatment: Adjuvant Therapy – Adjuvant Chemotherapy | Hall 1, 7.00 AM – 9.00 AM

Different MammaPrint and Blueprint molecular profiles and clinical-pathological features of early stage breast cancer in Chinese patients in the United States and Hong Kong

Kwong A., et al.

POSTER: P2-10-15

POSTER SESSION 2: Epidemiology, Risk, and Prevention: Ethnic/Racial Aspects | Hall 1, 7.00 AM – 9.00 AM

GENERAL SESSION PRESENTATION: GS4-05

Should age be integrated together with clinical and genomic risk for adjuvant chemotherapy decision in early luminal breast cancer? MINDACT results compared to those of TAILORx

Cardoso F., et al.

GENERAL SESSION 4 | Hall 3, 4:14 PM

FRIDAY, DECEMBER 13, 2019

Cyclin E overexpression is associated with high risk 70 gene signature, and may indicate intrinsic resistance to CDK4/6 inhibitors

Mittempergher L., et al.

POSTER: P4-10-24

POSTER SESSION 4: Prognostic and Predictive Factors: Biomarkers Predicting Treatment Sensitivity and Resistance | Hall 1, 7.00 AM - 9 AM

The FLEX real world data platform explores new gene expression profiles and investigator-initiated protocols in early stage breast cancer

Crozier JA., et al.

POSTER: OT3-17-02

ON-GOING TRIAL RESPONSE PREDICTIONS

OT3-Hall 1 | 5.00 PM - 7.00 PM
